Theme of the Seminar

One of the oldest civilizations in the world, the Indian civilization has a strong tradition of science and technology. Many theories and techniques discovered by the ancient Indians have created and strengthened the fundamentals of modern science and technology. While some of these groundbreaking contributions have been acknowledged, some are still unknown to most. The purpose of the seminar is to promote for revealing on the innovations and discovery Science, technology, management and mathematics (STEM) in ancient India covered all the major branches of human knowledge and activities, including science and engineering.
